

## Honoring Your Baby's Legacy Through Milk Donation

First and foremost, we would like to express our deepest condolences to you and your family. At Mothers' Milk Bank Southeast, we recognize that lactation after such a loss can feel deeply unfair and may amplify grief.

Deciding to become a milk donor after the loss of a child is a deeply personal choice. Our team is here to support you in your lactation options after loss.

If you decide that milk donation is right for you, Mothers' Milk Bank Southeast provides a simplified and supportive process for bereaved mothers throughout the screening process and donation journey.

1. Scan QR code for prescreening form
2. Schedule your screening call
3. Obtain OB's consent
4. Blood test (covered by us)
5. Approval to donate

All requirements related to minimum volume, medications, and herbs are waived for bereaved donors. Every drop of donated milk is utilized, ensuring that if we cannot safely dispense to recipient babies, it is instead used for research in our lab.

## Legacy & Remembrance

Bereaved donors have the option to place a personalized, engraved leaf on our memorial tree, attend events specifically for our bereavement donor families, or request a private tour.
